

YANCHENG “MAX” XIANG

yancheng.xiang@hotmail.com | (631) 913-5470 | [LinkedIn](#) | [Website](#)

Business Intelligence Analyst with retail and consumer experience translating business needs into actionable insights, self-service analytics, and automated workflows. Hands-on experience in SQL, Python, Power BI, Microsoft Fabric, ETL, data governance, and generative AI-assisted development. Partners with cross-functional stakeholders to improve data integrity, deliver reusable analytics tools, and drive adoption of AI-enabled workflows.

SKILLS

Analytics & Programming: SQL / T-SQL, Python (Pandas, NumPy, Streamlit), DAX, Power Query

Business Intelligence & Data: Power BI, Tableau, Microsoft Fabric, DuckDB, ETL, Data Modeling, Data Validation, Data Governance, Self-Service Analytics

AI & Automation: Claude Code, LLM, Generative AI, AI-Assisted Development, Prompt-Driven Workflow Automation

PROFESSIONAL EXPERIENCE

Vida Shoes International

New York, NY

Business Intelligence Analyst

May 2024 - Present

- **Commercial Analytics & Business Insights:** Partner with 10+ stakeholders across Finance, Planning, Operations, E-commerce, and Production to translate sales, gross margin, inventory, order, and shipment questions into actionable analytics supporting management reporting across \$400M+ annual revenue.
- **Inventory Anomaly Detection & Cost Optimization:** Analyzed inventory-turn performance to identify slow-moving SKUs, segmented inventory by aging buckets, and quantified monthly carrying costs across 113K+ pairs, identifying over \$2.5M in inventory investment exposure; presented actionable recommendations to leadership that informed inventory and assortment decisions.
- **End-to-End Self-Service BI Delivery:** Owned the full lifecycle of a centralized Power BI analytics hub, from stakeholder requirements gathering and solution design through development, data validation/UAT, deployment, and user training; delivered 15 dashboards serving 100+ users and reduced ad-hoc reporting requests by 60%.
- **AI Enablement & Process Automation:** Partner with departmental directors to identify repetitive business processes and design, develop, test and deploy 6 AI-enabled workflows and Python automations, with multiple solutions adopted for recurring operational use, saving approximately 10 hours of manual work per week.
- **Lakehouse & Analytics Engineering:** Built and continue to enhance a version-controlled DuckDB medallion lakehouse integrating 8 data sources through Python-based ingestion and transformation, reusable business logic, and data validation to support Power BI analysis and ongoing LLM-based self-service analytics agent prototyping.
- **LLM-Powered Workflow Automation:** Built LLM-powered email-to-task workflows that summarize incoming emails, extract actionable tasks, and support ongoing task tracking in planner across the Business Analyst team.
- **Executive Reporting Automation:** Developed version-controlled Python, SQL, and ETL workflows to automate 4 recurring C-suite reports, reducing data latency by 80% and eliminating approximately 50 hours of manual processing per month.
- **Fabric Migration & Data Validation:** Lead business requirements gathering and validation for a Microsoft Fabric migration, partnering with external data-engineering consultants to define Gold-layer business logic for 200+ reporting fields and align analytics outputs with financial reporting requirements.

Graham Windham

Brooklyn, NY

Performance Analyst (Contract)

Dec 2023 - Jun 2024

- **Automated Workforce Reporting:** Integrated Power BI with SharePoint to build 3 operational dashboards; established daily refresh schedules to provide real-time visibility into workforce metrics.
- **DAX & Query Optimization:** Refactored complex DAX measures and optimized Direct Query connections; reduced dashboard load times by 30%, significantly enhancing user experience.
- **Cross-Functional Analytics Delivery:** Partnered with department heads across four departments to gather business requirements, prioritize enhancements, and roll out self-service analytics solutions, delivering 14 stakeholder-driven improvements.

EDUCATION

Simon Business School, University of Rochester

Rochester, NY

M.S. in Business Analytics (STEM-Certified Program)

Dec 2023

Stony Brook University

Stony Brook, NY
